TOOLS FOR PHARMACEUTICAL INDUSTRY

Tools for pharmaceutical industry produced in Prvi Partizan company are upper and lower punches and dies. They are used in production of pills. They are made out of high-quality chrome-nickel steels and by technology that provides fulfillment of all demands regarding quality, lifetime and operating conditions. Perfect tool production enables achieving of desired geometrical forms of pills, by powder pressing: cylindrical, ellipse, triangular with or without markings and dividing lines, plane or spherical. According to customers' requirements, we produce tool that can form pills in free three-dimensional forms, with floral and animal decorations.
